**From Oxford Univ Pr : Land Law: Themes and Perspectives** before purchasing it in order to gage whether or not it would be worth my time, and all praised Land Law: Themes and Perspectives:

Land Law: Themes and Perspectives provides a collection of specially commissioned essays for students studying land law at undergraduate level. The book brings together leading authors, as well as some younger scholars, and explores

land law from a variety of traditions within legal scholarship. The book contains chapters on topics essential to all land law courses, and seeks to question the boundaries of the discipline and to engage with wider debates about the role of land in society. The five parts of the book address separate themes within land law. The first part explores what is meant by 'property in land'. Part two sets land law in a historical perspective, from romanist ideas on land through to recent land law reforms. Part three explores the connections between land law and citizenship, with chapters on women's claims to property, adverse possession, mortgages, homelessness, indigenous peoples in Australia, and post-apartheid laws in South Africa. Part four discusses a range of policy issues from the family home to the increasing 'europeanization of land law'. The final part of the book explores land law from a more traditional, doctrinal perspective, opening with a chapter setting out the five keys to an understanding of land law. It will be invaluable reading for all undergraduate students of land law as well as postgraduate students and researchers working in the area.

"While many of the chapters contain valuable novel insights into their subject matter, an understandable consequence of the volume's stated objectives is that much of its contents consist of reviews of existing material; this has the considerable merit of directing the interested reader on to sources of further study." *The Cambridge Law Journal*
