**From Edward Elgar Pub :** Law and Migration (International Library of Studies on Migration, 6) before purchasing it in order to gage whether or not it would be worth my time, and all praised Law and Migration (International Library of Studies on Migration, 6):

Law and Migration is an authoritative volume which draws on statutory and case law to expose the limitations of the law in protecting the individual caught in the complex web of national and regional constraints on migration. International law provides for the exercise of the sovereign power of states to control the entry of non-nationals. However, more recent international conventions have shown a growing awareness of the failure of the law to protect individuals and their families from violation of their human rights and civil liberties. Whilst avoiding open conflict with the principle of sovereignty, national courts have strived to comply with the spirit of human rights conventions and have often decided in favour of individuals. Despite this, border and internal controls on entry continue to proliferate. Globally the failure to establish an adequate legal framework which takes account of forced migration caused by wars and natural disasters has provoked a debate beyond the traditional legal norms. This volume presents a selection of published work from a variety of countries and addresses the theoretical questions and policy issues which will continue to tax lawyers in the twenty first century.
