It is well written and explains the code articles perfectly.0 of 0 people found the following review helpful. The best book for learning secured transactions!By dorisaroyceDon't delay...but this book, use it. You will be smarter for having done so! Trust me, this book got my

entire class through secured transactions and the bar.0 of 0 people found the following review helpful. ExcellentBy SullyProfessor Kilborn's book does an excellent job of breaking down the concepts for a more thorough understanding of LA security interests.

For the first time, readers will find here in one place a clear and up-to-date discussion of all of the various "security devices" in Louisiana law, including the most current Louisiana version of Article 9 of the Uniform Commercial Code, mortgages, statutory liens ("privileges"), and personal guarantees ("suretyship"). Written to be easily accessible by non-experts, this book offers both a basic introduction and a detailed but concise explanation of the operation of each of the available security devices, including the complex rules for determining priority among the various devices when they compete with each other, a trustee in bankruptcy, or the Internal Revenue Service. With the help of a logically structured and detailed table of contents, as well as simple illustrations of particularly complex topics, students and lawyers can solve difficult problems with minimal effort. By bringing all of this material together in a clear and focused framework, this book is designed to reduce study and research time for complex secured transactions questions and to increase students' and lawyers' confidence in the resolution of often difficult and confusing commercial law problems in the unique environment of Louisiana law.

About the Author Jason Kilborn is an assistant professor at John Marshall Law School in Chicago. He formerly taught at Louisiana State University Law Center.
