McGraw-Hills Essentials of Federal Taxation is a new 17-chapter volume designed for a one-semester course, covering the basics of taxation of individuals and business entities. This volume includes topics covered in both Taxation of Individuals and Taxation of Business Entities. The essentials volume eliminates the specialty chapters on investments, compensation, retirement savings, and home ownership and folds key topics from these chapters into the

main individual taxation chapters. To make room for this information, the discussion of individual for and from AGI deductions is separated into separate chapters. The essentials volume also discusses corporate formations before addressing corporate operations and it presents nonliquidating and liquidating corporate distributions in the same chapter. Available for fall 2012 courses, this volume is perfect for those teaching a one-semester course and for those who struggle to get through the 25-chapter comprehensive volume.
