Linda D. Jellum, David Charles Hricik : Modern Statutory Interpretation: Problems, Theories, and Lawyering Strategies before purchasing it in order to gage whether or not it would be worth my time, and all praised Modern Statutory Interpretation: Problems, Theories, and Lawyering Strategies:

0 of 0 people found the following review helpful. But maybe I just disliked the classBy One Cool CustomerI thought

this book was poorly written and really repetitive. But maybe I just disliked the class. Most boring subject ever. 2 of 3 people found the following review helpful. modern statutory interpretation, Problems, theories, and lawyering strategies By Aquinas T. easy, clear to understand and good contents. It is to recommend to law school students, social science scholars and law professionals . 1 of 4 people found the following review helpful. Falling apart! By Customer I only gave it a star so that I could write a review. The book arrived damaged and the binding is not in good condition, the book will fall apart.

This book is designed to teach statutory interpretation skills. It uses a combination of traditional cases along with problems to accomplish that objective. Broadly organized around the process of interpretation, it focuses first on the plain meaning of the text and then addresses the question of whether and, if so, when courts will examine sources other than the text. The book addresses the various approaches and theories to interpretation and examines how those approaches have been applied to particular interpretative problems, such as implied rights, administrative interpretations, and the interpretation of "uniform statutes." Within each chapter, subjects are introduced with concise summaries of the core concepts. After the introduction, a well-edited case explores the uncertainties and boundaries of those core concepts. The notes and questions following each principal case are designed to help focus the students' thoughts and understanding of the case before they come to class. Finally, problems are included to ensure that the students use the statutory interpretation skills they have just learned. Each problem lends itself to at least two arguments (often more) and allows for further inquiry into the concepts in the chapter. The second edition has been revised and updated to include more problems and a few new cases. Additionally, the legislative and administrative chapters have been substantially revised.

About the Author Linda Jellum is a Professor of Law at Mercer University School of Law. David Charles Hricik is an associate professor at Mercer University School of Law.
