Oded Shenkar : Organization and Management in China, 1979-90 (International Studies in Management and Organization : a Companion Book Series) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Organization and Management in China, 1979-90 (International Studies in Management and

Organization : a Companion Book Series):

Over the last decade China has engaged in one of the most comprehensive management reforms ever undertaken. These reforms are expected to determine China's ability to modernize and become a major world economic power. At the same time, the reforms touch on major political and social issues within the PRC, thereby affecting the structure and control of Chinese society. The contributors to this volume analyze Chinese management and organizations in seven chapters that assess the impact of the reforms on domestic Chinese enterprises across such diverse issues as decision-making, work values and managerial behaviour, three chapters on foreign joint ventures and three chapters on trade and trade organizations.
