George Lefcoe : Real Estate Transactions, Finance, and Development before purchasing it in order to gage whether or not it would be worth my time, and all praised Real Estate Transactions, Finance, and Development:

0 of 0 people found the following review helpful. Great book. You can tell the author understands real ...By CustomerGreat book. You can tell the author understands real estate at a practical (albeit affluent) level. The one and two star reviews complain about the Kindle edition which has no page numbers and a poor quality binding. The original, hardcover Lexis version is paginated, has an index, and quality binding. However, it is more expensive.0 of 0 people found the following review helpful. One StarBy CustomerTerrible terrible bookand a waste of time. Written for California real estate.1 of 1 people found the following review helpful. Clear and Concise, Covers EssentialsBy Abby R.This book is semi-biased towards California practice, but otherwise contains very clear and concise explanations of the essential real estate law concepts and issues. My professor requires this book every year, and I'm sure I'll hold onto

this one for future reference either in my own practice or my own real estate transactions.

This book focuses on the purchase, sale, financing, and development of real estate and the significance of legal rules and institutions at various stages of these transactions. Arranged in clearly labeled, self-contained chapters, it allows maximum flexibility for professors to tailor assignments to the needs of various courses, such as: An introductory Transactions or Conveyancing course, covering the work of real estate brokers, purchase and sale contracts, deeds and closings, recording acts, titles insurance, and realty contract remedies; A Mortgage Law course, with emphasis on loan fundamentals and practical aspects of dealing with defaults, foreclosures, bankruptcy, and workouts; and Advanced courses in selected topics concerning realty development and finance, including financing development, construction contracts, mechanics' liens, development profitability, real estate offerings as securities, public / private partnerships, land use settlements, federal income taxation of real estate, commercial leasing, and leases as financing instruments.
