From Kulick Andreas : Reassertion of Control over the Investment Treaty Regime before purchasing it in order to gage whether or not it would be worth my time, and all praised Reassertion of Control over the Investment Treaty Regime:

Driven by public opinion in host states, contracting parties to investment agreements are pursuing many avenues in order to curb a system that is being perceived - correctly or not - as having run out of control. *Reassertion of Control over the Investment Treaty Regime* is the first book of its kind to examine the many issues of procedure, substantive law, and policy which arise from this trend. From procedural aspects such as frivolous claims mechanisms, the establishment of appeals mechanism or state-state arbitration, to substantive issues such as joint interpretations, treaty termination or detailed definitions of standards of protection, the book identifies and discusses the main means by which states do or may reassert their control over the interpretation and application of investment treaties. Each chapter tackles one of these avenues and evaluates its potential to serve as an instrument in states' reassertion of control.

About the Author Andreas Kulick is a Senior Research Fellow at Eberhard-Karls-Universitt Tbingen, Germany. He has published extensively on various aspects of public international law, including a previous monograph, *Global Public Interest in International Investment Law* (Cambridge, 2012). He has advised and represented states in various matters of public international law before international courts and tribunals, as well as before domestic courts.
